DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of the record in particular Adam'138 and Takano'957 do not teach or suggest a supporting structure for a generator assembly having a plurality of DC sources on the exciter, wherein each of the DC sources has a respective first-voltage terminal and a respective second-voltage terminal, the system comprising: *a first conductive plate defining a first aperture, the first conductive plate being supported by the rotor and comprising: a first rotor winding terminal by which the first conductive plate is electrically coupled to the windings; and a first plurality of terminals configured to be respectively coupled to the first-voltage terminals of the DC sources; and a second conductive plate defining a second aperture, the second conductive plate being supported by the rotor and electrically insulated from the first conductive plate, the second conductive plate comprising: a second rotor winding terminal by which the second conductive plate is electrically coupled to the windings; and a second plurality of terminals configured to be respectively coupled to the second-voltage terminals of the DC sources.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
